

# CERTIFICATE OF ANALYSIS

## ERM<sup>®</sup>-EG001

ANTIMONY IMPLANTED SILICON		
Quantity	Certified value	Uncertainty
Areal density of Sb atoms / $10^{16} \text{ cm}^{-2}$	4.81 <sup>1)</sup>	$\pm 0.06$ <sup>3)</sup>
Isotope amount ratio $n(^{121}\text{Sb})/n(^{123}\text{Sb})$	1.435 <sup>2)</sup>	$\pm 0.006$ <sup>4)</sup>
<p>1) Unweighted mean value of the means of 4 sets of data obtained with Rutherford Backscattering Spectrometry (RBS), Instrumental Neutron Activation Analysis (INAA) and Inductively Coupled Plasma Isotope Dilution Mass Spectrometry (ICP-IDMS).</p> <p>2) Unweighted mean value of the means of 2 sets of data obtained with INAA and ICP-IDMS.</p> <p>3) Expanded uncertainty <math>U = k \cdot u_{cert}</math> with <math>k = 2</math>, corresponding to a level of confidence of about 95 %. <math>u_{cert}</math> is the combined standard uncertainty and is estimated from the combined uncertainties of 4 sets of measurements and the uncertainty due to inhomogeneity in fractions of the chip surface of <math>\sim 0.15 \text{ mm}^2</math>.</p> <p>4) Expanded uncertainty <math>U_{CRM} = k \cdot u_{cert}</math> with <math>k = 2</math>. <math>u_{cert}</math> corresponding to a confidence interval of about 95 % is estimated from the combined uncertainties of 2 sets of data.</p>		

This certificate is valid for one year after purchase.

Sales date:

### NOTE

European Reference Material ERM<sup>®</sup>-EG001 was originally certified as IRMM-302 and BAM-L001 It was produced and certified by the Institute for Reference Materials and Measurements (IRMM) and the Bundesanstalt für Materialforschung und -prüfung (BAM) according to the principles laid down in the technical guidelines of the European Reference Materials<sup>®</sup> co-operation agreement between BAM-LGC-IRMM. Information on these guidelines is available on the Internet (<http://www.erm-crm.org>). Responsible for this certificate is BAM.

Accepted as an ERM<sup>®</sup>, Geel, April 2004  
Revised July 2004  
Shelf life statement changed September 2006

## Informative Values

Quantity	Informative value	Uncertainty <sup>5)</sup>
Areal density of the sum of Si, O and Sb atoms in the oxide layer / $10^{17} \text{ cm}^{-2}$	5.9	$\pm 0.6$
Areal density of the sum of Si, O and Sb atoms in the layer corresponding to the projected range of the Sb distribution / $10^{17} \text{ cm}^{-2}$	9.9	$\pm 1.0$
Areal density of the sum of Si and Sb atoms in the layer corresponding to the width of the Sb distribution (full width at half maximum) / $10^{17} \text{ cm}^{-2}$	6.5	$\pm 0.8$

5) The stated expanded uncertainties (with  $k = 1$ ) are estimated assuming 10 % uncertainty in the stopping power.

### DESCRIPTION OF THE SAMPLE

The sample is a 10 mm × 10 mm silicon chip with a thermally grown surface oxide layer and Sb ions implanted with an energy of 400 keV.

### MEAN VALUES OF THE DATA SETS

The numbers in parentheses are combined standard uncertainties  $u_c$  of the methods.

Analytical method (lab.)	Areal density of Sb atoms / $10^{16} \text{ cm}^{-2}$	$n(^{121}\text{Sb}) / n(^{123}\text{Sb})$
RBS (IRMM)	4.840 (0.046)	
RBS (BAM)	4.805 (0.042)	
INAA (BAM)	4.804 (0.029)	1.435 (0.004)
ICP-IDMS (BAM)	4.784 (0.014)	1.4357 (0.0024)

### PARTICIPANTS

Implantation: Forschungszentrum Rossendorf (FZR), Dresden (DE)  
 Homogeneity: Bundesanstalt für Materialforschung und -prüfung (BAM), Berlin (DE)  
 Certification: Bundesanstalt für Materialforschung und -prüfung (BAM), Berlin (DE)  
 European Commission, Joint Research Centre, Institute for Reference Materials and Measurements (IRMM), Geel (BE)

## INSTRUCTIONS FOR USE

The certified value for the areal density of Sb atoms is valid for fractions of the chip surface down to 0.15 mm<sup>2</sup> in size. If smaller sizes are used for analysis, a sufficient number of different positions must be analysed in order to ensure representative sampling.

The implanted side of the CRM is the polished, reflective one.

THE REFERENCE MATERIAL MUST NOT BE HEATED ABOVE 150 °C.

## STORAGE

The material should be stored at ambient conditions in a dry and clean environment. The European Commission cannot be held responsible for changes that happen during storage of the material at the customer's premises, especially of opened samples.

## LEGAL NOTICE

Neither IRMM, its contractors nor any person acting on their behalf:

(a) make any warranty or representation, express or implied, that the use of any information, material, apparatus, method or process disclosed in this document does not infringe any privately owned intellectual property rights; or

(b) assume any liability with respect to, or for damages resulting from, the use of any information, material, apparatus, method or process disclosed in this document save for loss or damage arising solely and directly from the negligence of IRMM.

## NOTE

A detailed technical report is available on [www.erm-crm.org](http://www.erm-crm.org). A paper copy can be obtained from IRMM on request.
