

Mikromol™

Certificate of Analysis

ISO 17034

Reference Material

Product name

Isoconazole Nitrate

Product code

MM0541.00-0250

CAS number

24168-96-5

Molecular weight

479.14

Molecular formula

C₁₈H₁₄Cl₄N₂O HNO₃

Lot number

G986433

Appearance

white solid

Melting point

180 °C (dec)

Long-term storage

2 to 8 °C, dark

Assay¹ "as is"
99.95 %

Uncertainty² U
0.6 %

Intended Use: Use for identification and quantification. The assay is verified by a second testing method. Due to the homogeneity studies, the minimum amount of sample to be used is 10 mg.

Date of shipment: **02 Sep 2019**

Producer confirms that this reference material (RM) meets the specification detailed on this Certificate of Analysis for **one year** from the date of shipment, provided the substance is stored under the recommended conditions unopened in the original container.

Release by:	Date of Release:		Product Release
Dr. Sabine Schröder	Luckenwalde, 19 Aug 2019		

¹ Calibration and verification were carried out using standards traceable to SI-units. The value is expressed on an "as is" basis.

² The uncertainty "U" is the expanded uncertainty of the testing method for the assigned value estimated in accordance with the Guide to the Expression of Uncertainty in Measurement (GUM). It corresponds to a level of confidence of about 95%. Coverage factor k=2.

MikromolTM

Important product information

This RM is intended for laboratory use only and is not suitable for human or animal consumption.

This RM conforms to the characteristics of a primary standard as described in the ICH Guidelines. The values quoted in this Certificate of Analysis are the producer's best estimate of the true values within the stated uncertainties and based on the techniques described in this Certificate of Analysis. The production of this RM was undertaken in accordance with the requirements of ISO 17034. The identity is verified by data from international scientific literature.

Storage and handling

Before usage of the RM, it should be allowed to warm to room temperature. No drying is required, as assigned values are already corrected for the content of water and other volatile materials.

Revision table

Assigned value

Assay "as is": 99.95 %; U = 0.57 %

The assay "as is" is assessed by quantitative NMR spectroscopy and is equivalent to the assay based on the not-anhydrous and not-dried substance. The assay is verified by 100% method (mass balance).

The verified result lies inside our acceptance criteria, i.e. less than 1.0 % difference to assay assigning technique.

For quantitative applications, use the assay as a calculation value on the "as is basis". The uncertainty of the assay can be used for estimation/calculation of measurement uncertainty.

Method 1: Value assigning technique - quantitative NMR spectroscopy	
Conditions	400 MHz, DMSO-d ₆
Internal standard	2,3,5,6-Tetrachloro-1-nitrobenzene (certified reference material), signal 8.2 - 8.8 ppm, 1 H
Result (mass fraction, n = 6)	99.95 %; U = 0.57 %

Quantitative NMR spectrum

Method 2: Value verifying technique - 100% method

100% method (mass balance) with chromatographic purity by HPLC

Result	99.70 %
---------------	---------

The calculation of the 100% method follows the formula:

$$\text{Assay (\%)} = (100 \% - \text{volatile contents (\%)}) * \frac{\text{Purity (\%)}}{100 \%}$$

Volatile contents are considered as absolute contributions and purity is considered as relative contribution.
Inorganic residues are excluded by additional tests.

Purity

Purity by High Performance Liquid Chromatography (HPLC)

HPLC Conditions:

Column	Hypersil Gold C18; 5 µm, 150 x 4.6 mm
Column temperature	40 °C
Detector	DAD, 210 nm
Injector	Auto 5.00 µl; 0.081 mg/ml in Acetonitrile/Water 50/50 (v/v)
Flow rate	1.0 ml/min
Phase A	Water, 0.1 % H ₃ PO ₄
Phase B	Acetonitrile, 0.1 % H ₃ PO ₄
Gradient program	0-10 min A/B 60/40 10-13 min A/B to 20/80 13-15 min A/B to 60/40 15-25 min A/B 60/40 (v/v)

HPLC chromatogram and peak table

Area percent report - sorted by signal

Pk #	Retention time	Area	Area %	
1	6.410	0.157	0.14	
2	10.473	115.526	99.70	
3	13.957	0.009	0.01	
4	15.870	0.178	0.15	
Totals		115.87	100.00	

The content of the analyte was determined as ratio of the peak area of the analyte and the cumulative areas of the purities, added up to 100 %. System peaks were ignored in calculation.

Result (n = 6)

99.70 %; U = 0.19 %

Volatile content

Water content

Method Karl Fischer titration

Result No significant amounts of water were detected (< 0.05 %).*

*not accredited testing method

Residual solvents

Method ¹H-NMR

Result (n = 1) No significant amounts of residual solvents were detected (< 0.05 %).*

*not accredited testing method

Inorganic residues

Method: Sulphated ash, EP 8.7 (2.4.14)*

According to the available data, the presence of inorganic impurities in the reference substance other than those detectable by sulphated ash is highly unlikely. Inorganic residues can be excluded by results of the sulphated ash. Therefore, no assay correction was performed for inorganic impurities.

*not accredited testing method

Identity

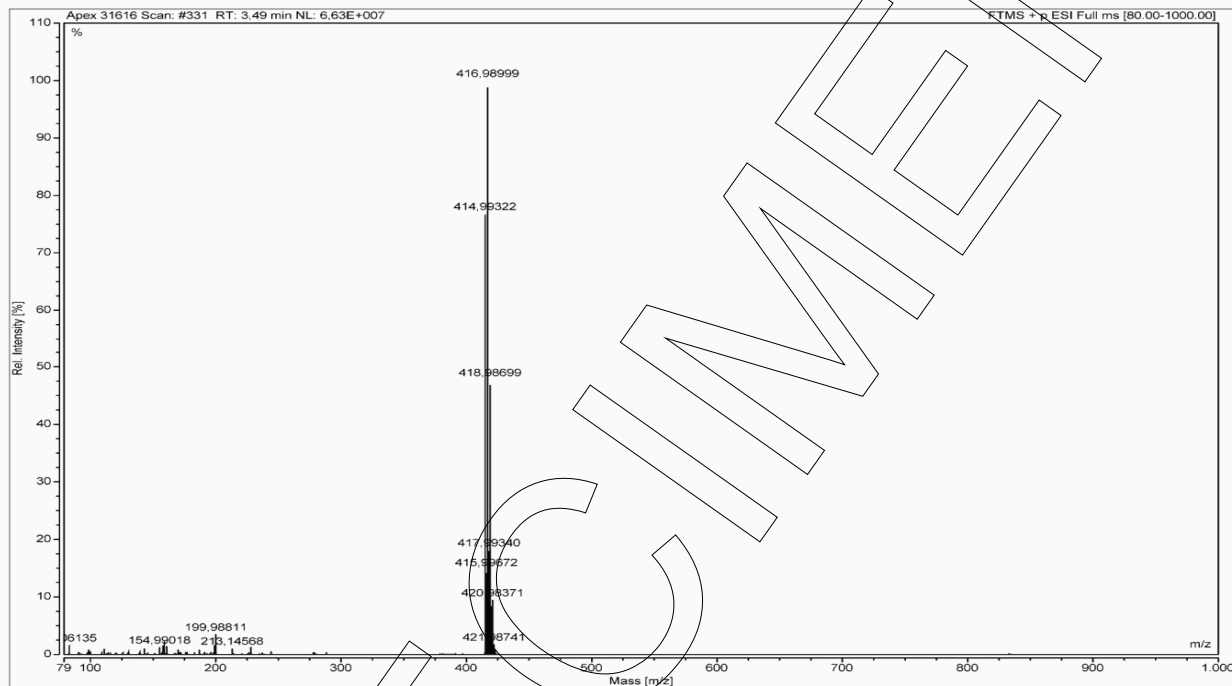

The identity is assessed by ISO/IEC 17025 accredited testing methods.

Method	Conditions	Result
¹ H-NMR	400 MHz, DMSO-d ₆	Structure confirmed

Method	Conditions	Result
MS	3.5 kV ESI+; capillary temperature: 269 °C Theoretical value: 414.99330	Structure confirmed

Method	Conditions	Result
IR	Attenuated Total Reflection Fourier Transform Infrared (ATR-FTIR) Spectroscopy	Structure confirmed

Results of Peak Find		
No.	Position	Intensity
1	3112.55	88.2002
2	2033.57	92.5952
3	1582.31	83.3928
4	1381.75	64.9981
5	1334.5	64.6268
6	1275.68	77.4744

8	1025.94	75.639
9	859.132	71.94
10	759.816	63.3898

Stability and homogeneity

Accelerated stability studies indicate no significant instability. The given validity period is based on this data. This is backed up by additional stability testing and historical data over the range of several years.

RM quality is controlled by regularly performed quality control tests (re tests). Homogeneity assured by qualified process of preparation and verified by homogeneity testing.

Revision table

Revision	Date	Reason for revision
00	19 Aug 2019	Release of the Certificate of Analysis - initial version

Product warranties for the RM are set out in the terms and conditions of purchase.
