

REFERENCE MATERIAL CERTIFICATE

Reference Material

This certificate is designed in accordance with ISO Guide 31. This reference material (RM) was designed, produced and verified in accordance with a registered quality management system ISO 9001. All measurements were performed according to ISO/IEC 17025 by a DAkkS accredited laboratory (D-PL-19883-01-00).

Product Name

N-Nitroso-di-isopropylamine 10 µg/mL in Methanol

Product Code  
DRE-L15604700ME

Lot Number  
1069155ME

CAS No.  
601-77-4

Format  
Solution

Mol. Weight  
130.19

Expiry Date  
15 May 2025

Mol. Formula  
C<sub>6</sub>H<sub>14</sub>N<sub>2</sub>O

Storage Temp  
20°C ± 4°C

<b>CERTIFIED</b> Concentration 10.0 µg/mL	<b>CERTIFIED</b> Expanded Uncertainty (U) 0.3 µg/mL
---	---

Uncertainty

The certified value(s) and uncertainty(ies) are determined in accordance with EURACHEM/CITAC Guide for "Quantifying Uncertainty in Analytical Measurement, 3rd edition", with an 95% confidence level (k=2). Uncertainty is based on the Total Combined Uncertainty, including uncertainties of characterisation and stability testing. Stability values are based on real evidence opposed to simulation.

The producer certifies that this reference material meets the specification stated in this certificate until the expiry date, provided it is stored unopened at the recommended temperature herein. Product warranties for this reference material are set out in the terms and conditions of purchase.

REFERENCE MATERIAL CERTIFICATE

CHROMATOGRAM

No chromatogram available.

**Method of Preparation**

The certified value is based on gravimetric and volumetric preparation of this RM. This RM has been confirmed by the appropriate analytical techniques.

**Batch Information**

Solvent: Methanol, Lot No. V8F518048G50, 580.00 mL.

**Gravimetric Data**

Compound Name	Lot No.	Weight (mg)	Purity (%)
N-Nitroso-di-isopropylamine	1048081	5.834	99.4

**Intended Use**

This RM is intended for use in a laboratory as a calibration and quality control standard or in method development for analytical techniques.

the balances is verified daily internally and annually by an external accredited calibration service. Chromatographic methods are traceable to the International System of Units (SI).

**Instructions for use**

The RM should be used shortly after opening to avoid concentration changes due to evaporation. It is recommended to use 1 mL as the minimum sample size and if less material is used, to increase the certified uncertainty by a factor of two for half sample and four for a quarter of sample. If storage after opening is necessary, the RM should be tightly closed and kept from light and moisture. If the RM was in a sealed ampoule, it should be transferred to a vial with minimum head space. Visit the support section of our website [lgcstandards.com](http://lgcstandards.com) for a series of Dr. Ehrenstorfer Tech Tip videos and frequently asked questions.

**Safety**

Proper precautions should be observed while handling. See Safety Data Sheet.

**Storage**

The RM should be stored in the original sealed container at the indicated temperature.

**Traceability**

The balances used for gravimetric measurements are calibrated with weights traceable to the national standards (DKD). The calibration of
