

XRF Petroleum Standard

Sulfur (S)

Product #: VHG-SDSL-BLK-100

Matrix: #2 Diesel Fuel

Lot #: 1001005-15

Element	Concentration and Uncertainty		
S	Certified W/W	100 ppb (w/w)	+/- 1% relative

This solution is intended for use as a calibration or reference standard for sulfur in various petroleum products with x-ray fluorescence spectrometry (XRF).

Certification: VHG standards are manufactured and certified under a quality control system that is accredited to both **ISO 9001** and **ISO/IEC 17025**. This standard was analyzed for sulfur content by wavelength dispersive x-ray fluorescence spectrometry (WDXRF) with traceability to NIST SRM 2770 and by hydrogenolysis and rateometric colorimetry (ASTM D4045).

Tools: The balances used in the preparation of VHG CRMs are calibrated regularly with traceability to NIST. All volumetric dilutions are performed in class A glassware which is recalibrated regularly according to NIST recommended procedures. Measurement of standard preparation temperature was done using a calibrated thermometer maintained under internal procedure 4.11-A.

Uncertified Values:

Density: 0.806 g/mL @ 20°C

Recommendations: VHG guarantees the accuracy of this solution for **24 Months** from the certification date shown below, provided it is kept tightly capped in its original container and stored under normal laboratory conditions. Do not freeze, heat, or expose to direct sunlight. Minimize exposure to moisture or high humidity. We recommend that the solution is thoroughly mixed by repeated shaking or swirling of the bottle immediately prior to use. To achieve the highest accuracy the analyst should: (1) use only pre-cleaned containers and transfer-ware, (2) never pour used product back into the original container.
